

# RE-EARTH<sup>®</sup>

## SLK-7

Group 3 Fertilizer, Registration no: M220 (Act 36 of 1947)

**RE-EARTH<sup>®</sup>** is a scientifically formulated proprietary blend of microbes carefully selected for their ability to enhance plant growth and increase fertilizer efficiency. **RE-EARTH<sup>®</sup>** is completely organic-based and environmentally friendly, and is highly compatible with sustainable, organic farming practices.

**RE-EARTH<sup>®</sup>** increases the efficiency of fertilizer uptake and creates an optimal, balanced growing environment, as nature intended.

### Why Use RE-EARTH<sup>®</sup>?

- RE-EARTH<sup>®</sup> Improves yields
- RE-EARTH<sup>®</sup> Promotes plant growth
- RE-EARTH<sup>®</sup> Increases fertilizer efficiency
- RE-EARTH<sup>®</sup> Increases soil organic matter
- RE-EARTH<sup>®</sup> Improves germination
- RE-EARTH<sup>®</sup> Improves plant resistance to stress

**Packsize:** 2x5L per box

**Shelf-Life & Storage:** 12 months at 5°C to 21°C

**RE-EARTH<sup>®</sup>** can be co-applied with chemical fertilizers in dilution and most pesticides, except fungicides.
